

# Boost team effectiveness with mobile and cloud technology

Empower your team to transform your business

Business teams today are often distributed across the world, working at various hours with a variety of devices. Employees value flexible work environments that support real-time collaboration and remote access to all the information required to get their job done. And you need peace of mind that your business data is protected wherever it goes.

Technologies designed for a cloud-first, mobile-first world can empower a modern workforce. Enable your team to share documents, edit files simultaneously, and access company networks from different devices and locations. With the right cloud solution, you can foster team connections to ensure your staff stays productive. And, you can be sure your business data and devices are safeguarded against modern threats – even outside the office.

Boost productivity across your workplace by employing integrated mobile and cloud solutions from Microsoft.

Work better together

Support teamwork and communication across your business from multiple locations.

Provide anywhere access

Enable your team to get things done effectively – on any device.

Protect data wherever it goes

Safeguard business data from unauthorized access and modern threats.

# How Microsoft solutions can boost productivity in your business

## Collaborate in real-time across the organization

Work simultaneously on documents with a dispersed team – and store and save your work in the cloud with Office 365. It works on any device – Windows 10 Pro, Android, iOS.

## Network across the globe – virtually

Meet online across locations. Use HD video and voice meetings, plus transmit content on the device of your choice, with Skype for Business in Office 365.

## Enable rich, insight-based decision-making

Get automatic security and feature updates delivered from the cloud – without interruptions to users – with Office 365 and Windows 10 Pro.

## Enable employees to work how they want

Provide easy access to familiar Office apps on the devices your staff prefer – Windows, iOS, or Android – using cloud-based Office 365.

## Store data cost-effectively

Enable personalized service by accessing, sharing, and updating customer information in real-time with Dynamics 365.

## Deliver familiar, intuitive

Give your team the experiences they want – like touch, ink, or voice – across a range of compelling, productive Windows 10 Pro devices.

## Get better device protection and security management

Safeguard and manage Windows, Android and iOS devices – and protect your operating system, files, and thousands of SaaS apps – using Enterprise Mobility + Security.

## Safeguard against security theft

Strengthen identity protection with multi-factor authentication, including fingerprint and PIN, in Windows 10 Pro.

## Keep data safe and contained

Shield data from leaks or unsanctioned actions, such as unauthorized printing or forwarding of documents, using Windows Information Protection in Windows 10 Pro plus Rights Management Services in Office 365.

## How we can help

*With MICROAGE and MICROSOFT, we can help you take your business to the next level.*

## Let's do business together
